6. Read the following passage and answer the questions.

On August 6, 1945, the first atomic bomb was dropped on Hiroshima, in Japan. It produced an explosion equal to 20,000 tons of T.N.T. (until then the most powerful explosive that the world had known). It killed about 2000,000 people. If this bomb had not been used then, the world would not have realized _____ to the full its destructive power. Since then, a hydrogen bomb has been perfected by certain world powers. It is believed that this terrible bomb, if it is exploded, will release energy equal to 100 megatons, that is to say one hundred million tons of T.N.T. The Hiroshima bomb killed 2000,000 people. That is a terrible number _____ of deaths; but if a single hydrogen bomb is used in warfare, it will kill about a thousand million people. If five such bombs are dropped on the five inhabited continents, the entire population of the world, which is estimated at about three thousand million people, will be destroyed. This is the reason why the great mass of the people in the world do not want another war. If there were another war, and if hydrogen bombs were to be used in it, the whole world would be destroyed.

6. Read the following passage and answer the questions.

Co-operation means working together for the *benefit* of all. Without co-operation modern society could not exist. Co-operation has been seen at its best among farmers in the dry *regions* of certain parts of Australia and America. The fields have been *irrigated* in these regions. Crops cannot be grown without water. Water cannot be brought to the fields without streams being *tapped* higher up. For this purpose canals and *dams* have been built. The canals have been cut through the fields of more than one farmer. Those who live higher up the valley than the others have allowed canals to be built through their land in order to carry water to the fields of farmers lower down. In times of *drought* all are able to share the water. Instead of taking all the water for themselves, the farmers on the higher *land* leave enough for their neighbours down the valley. Farming in dry areas has been *made* possible by such cooperation. By co-operation farmers have learned to make even the desert produce crops.

A. Find words in the passage to complete the following sentences.

- The key to success in any field is _____.
- _____ can be used to store water for future use during times of drought.
- In the dry _____ of America co-operation amongst farmers is necessary.

Reading -15**1. Read the passage below and answer the questions that follow:**

Various kinds of nuclear weapons have been produced in the past few years by many countries. This is a new and a terrible development in the history of man. Very few events can be more frightful than a nuclear war. In a nuclear war, most of the world's population will be exterminated. The few living creatures that survive will be exposed to radiation or to electrical rays harmful to life. It has been said by scientists that many new diseases will be caused by radiation. There will also be an acute shortage of food, for all the crops and stores will be poisoned by radiation. Most of the areas on which nuclear bombs have been dropped will be ruined. Therefore the survivors of a nuclear war will be sick, hungry and homeless. It might be better, perhaps, to be killed in a nuclear war than to survive it. It would be better still for men to live in peace with one another. If this can be achieved there will be no nuclear war.

Are you unhappy about the shape of your nose? Or do you feel that your ears are too big or your eyes too small? You don't need to despair about any of these things any longer. They can all be put right by a surgeon. Surgeons are doctors who make sick people well by operating on them. But some surgeons today are really beauty specialists. Their job is to make ugly or plain people beautiful. This work is called plastic surgery. Plastic surgeons are very popular in some countries. They make a lot of money by selling beauty to men and women- especially women. Plastic surgery is very expensive. A new nose may cost almost as much as a new car. Suppose I can afford to pay so much money and want to change my ugly nose for a more handsome one. I must consult a plastic surgeon. What will he do?

First of all, he will ask me to enter a nursing home. I shall have to spend about three weeks there. The surgeon will give me an anaesthetic. Then he will operate on my nose to give it the shape. I shall have to spend the next week or two anxiously wondering whether the operation has been successful or not. 'Will my nose really look better? Or shall I look uglier than before? Won't there be scars after the operation? What shall I do if my nose is not the shape I wanted? And so on. And then the great day will come. The surgeon will take off the bandages and the plaster, and I shall see my expensive new nose! Will it be worth all the trouble and expense? Sometimes these operations go wrong, and then the patient comes away looking worse than before.
