1	Read the following passage and answer the questions that follow: Anne Wilson was a keen student of science. On her birthday, she wanted her family to give her useful presents. So almost all their presents had something to do with science. Mr. Wilson bought her a set of dissecting instruments. It cost him a lot of money, but he did not mind the expense. He wanted Anne to do well in her studies. Mrs. Wilson gave her a box of weights. It was quite expensive, but it did not cost as much as the dissecting set. Anne's uncle gave her a microscope and a magnifying glass. Her sister gave her a set of slides. But Anne's little brother Tom bought her a big box of chocolates. He said he liked that better than anything else. Anne agreed with him. She was getting a little tired of her useful presents, after all.	2	U

Reading -15

1. Read the following passage and answer the questions that follow:

On August 6 1945 the first atomic bomb was dropped on Hiroshima in Japan. It produced an explosion equal to 20,000 tons of T.N.T (until then the most powerful explosion that the world had known). It killed about 200,000 people. If this bomb had not been used then, the world would not have realized to the full its destructive power. Since then, a hydrogen bomb has been perfected by certain world powers. It is believed that this terrible bomb, if it is exploded, will release energy equal to 100 megatons, that is to say one hundred million tons of T.N.T. The Hiroshima bomb killed 200,000 people. This is a terrible number of deaths; but if a single hydrogen bomb is used in warfare, it will kill about a thousand million people. If five such bombs are dropped in five inhabited continents, the entire population of the world, which is estimated at about three thousand million people, will be destroyed. This is why the great mass of the people in the world do not want another war. If there were another war and if hydrogen bombs were to be used in it, the whole world would be destroyed.

A. Answer the following questions in one complete sentence:

1x 5=5

- What adjective can be used to describe the power of an atomic bomb?
- Which bomb is more powerful? Atomic bomb or hydrogen bomb?
- Who produced the hydrogen bombs?
- Why do most of the people of the world do not want another war?
- What would happen to the whole world population if five hydrogen bombs were dropped in five inhabited continents?

B. Fill in the gaps with words taken from the passage:

8x0.5=4

The people of world did not know what could be the destructive (1)-----of T.N.T before the atomic bomb was (2)-----on a (3)-----city called Hiroshima in 1945. This bomb had a powerful explosion. But this power was far less intensive than the power of (4)-----bomb which had been produced by certain(5)-----power. The power of a hydrogen bomb can be measured by(6)-----which has a capability of destroying one thousand million people. Since, whole population of the world can be (7) -----by dropping of the hydrogen bombs, most of the people of the world don't want another (8) -----where these terrible bombs might be dropped.

C. Identify true and false:

6x0.5=3

- In 1945 Japan used atomic bomb.
- The people of the world would know the full power of TNT before August 06, 1945.
- The power of hydrogen bomb is far greater than that of atomic bomb.
- Most of the people of the world are not in favour of another war.
- Five hydrogen bombs can kill entire population of the world.
- There are five continents where people can live..

Reading-15

7. Read the following passage and answer the questions that follow.
- Cooperation means working together for the benefit of all. Without cooperation modern society could not exist. Cooperation has been seen at its best among farmers in the dry regions of certain parts of Australia and America. The fields have been irrigated in these regions. Crops cannot be grown without water. Water cannot be brought to the fields without streams being tapped higher up. For this purpose canals and dams are built. The canals have been cut through the fields of more than one farmer. Those who live higher up the valley than the others have

allowed canals to be built through their lands in order to carry water to the fields of farmers lower down. In times of drought all are able to share the water. Instead of taking all the water for themselves, the farmers on the higher land leave enough for their neighbors down the valley. Farming in dry areas has been made possible by such cooperation. By cooperation farmers have learned to make even the desert produce crops.
