

Course Title: Microcomputer Application I
Course Code: CSE-2402

Topic: Microsoft PowerPoint topics
(Slide Window Detail, Hyperlinks, Audio, Video)

Mohammad Jahedul Alam Chy
Lecturer in CSE
Department of QSIIS

International Islamic University Chittagong (IIUC)

Lecture Agenda

What we will cover today

01 Slide Window Detail

Understand the PowerPoint interface — panels, ribbons & views

02 Hyperlinks

Create internal/external links and action buttons

03 Audio

Insert, format and control audio clips in presentations

04 Video

Embed, trim and style videos on slides

05 Lab Task

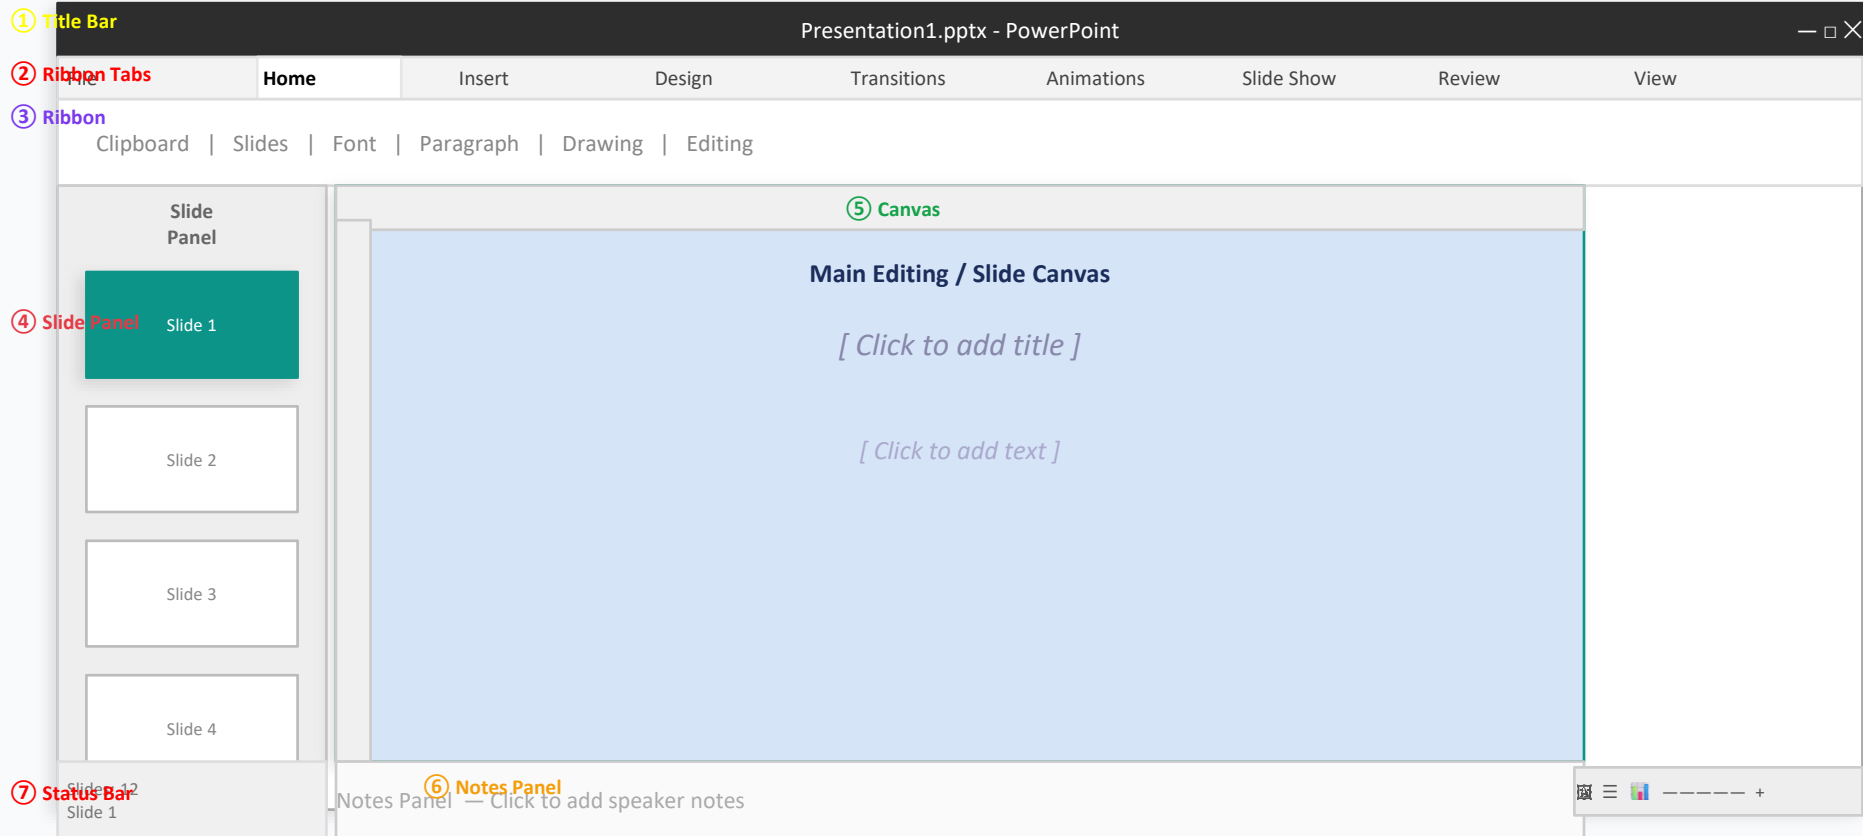

Hands-on practice to reinforce all four topics

Section 01

Slide Window Detail

Exploring the PowerPoint Interface

Slide Window — Interface Diagram

Key Components of the Slide Window

Quick Access Toolbar

Located above the Ribbon. Contains Save, Undo, Redo buttons. Customizable for frequently used commands.

Ribbon

Organized into tabs (Home, Insert, Design...). Each tab contains groups of related commands. Can be collapsed to maximize workspace.

Slide Panel

Displays thumbnail previews on the left. Allows rearranging, duplicating, hiding slides. Right-click for context menu options.

Slide Canvas

The main editing workspace. Contains placeholders for text, images, charts. Supports guides, gridlines and rulers.

Notes Panel

Speaker notes typed here are NOT visible to audience. Can be printed as handouts. Useful for presenter reminders.

View Buttons

Normal, Outline, Slide Sorter, Notes Page, Reading View, Slide Show. Located bottom-right. Includes zoom slider.

View Modes Explained

Shortcut: View Tab → Presentation Views

Normal View

Default

Split screen: Slide panel + Canvas + Notes.
Best for content creation.

Outline View

Text-focused

Shows slide text hierarchically. Great for
structuring content and quick edits.

Slide Sorter

Overview

All slides displayed as thumbnails. Easy to
reorder slides by dragging.

Notes Page

Print

Slide + speaker notes layout. Used when
printing handouts with notes.

Reading View

Review

Full-screen slide-by-slide reading. No editing.
Good for final review.

Slide Show

F5 / Shift+F5

Present to audience. F5 = from start,
Shift+F5 = from current slide.

Practice Questions — Slide Window

1

Name the three main areas visible in Normal View and explain the purpose of each.

2

What is the keyboard shortcut to start a Slide Show from the beginning vs. from the current slide?

3

Where is the Quick Access Toolbar located, and how can you add commands to it?

4

Describe the difference between Slide Sorter View and Outline View. When would you use each?

5

A student wants to add speaker notes without the audience seeing them. Which panel should they use? How are notes printed?

6

What happens when you right-click a slide thumbnail in the Slide Panel? List three options.

Section 02

Hyperlinks

Connecting slides, files, and the web

Types of Hyperlinks in PowerPoint

Web URL

1. Select text or object
2. Insert → Link (Ctrl+K)
3. Choose 'Existing File or Web Page'
4. Type URL e.g. <https://google.com>
5. Click OK

Example: 'Visit our website' → <https://university.edu>

Slide in Presentation

1. Select text or shape
2. Insert → Link
3. Choose 'Place in This Document'
4. Select target slide
5. Click OK

Example: 'Go to Summary' → jumps to Slide 10

Another File

1. Select text or object
2. Insert → Link
3. Choose 'Existing File or Web Page'
4. Browse to target file
5. Click OK

Example: 'Open Report' → opens report.pdf

Email Address

1. Select text
2. Insert → Link
3. Choose 'Email Address'
4. Enter email & subject
5. Click OK

Example: 'Contact Us' → <mailto:info@uni.edu>

Action Buttons & Hyperlink Tips

Action Buttons

Insert → Shapes → Action Buttons (bottom section)

After inserting, the Action Settings dialog opens automatically. Choose 'Hyperlink to:' and pick the destination.

✓ Best Practices & Tips

Test all hyperlinks in Slide Show mode — they don't activate in Edit mode.

Change hyperlink color via Design → Variants → Colors to match your theme.

Use ScreenTips (tooltip text) to explain where a link leads before clicking.

Relative paths break when moving files. Use absolute paths or embed content.

'Place in This Document' links are great for non-linear / interactive quizzes.

Keyboard shortcut: Select text → Ctrl+K opens the Insert Hyperlink dialog.

Practice Questions — Hyperlinks

1

What is the keyboard shortcut to open the Insert Hyperlink dialog?

2

Explain the difference between linking to 'Existing File or Web Page' vs 'Place in This Document'.

3

A teacher wants a quiz slide where clicking 'Correct!' goes back to the menu. Which link type should be used?

4

Where in the Ribbon are Action Buttons found? Name two built-in Action Button types.

5

What is a ScreenTip and how do you add one to a hyperlink?

6

Why might a hyperlink to another file break after moving the presentation to a different computer?

Section 03

Audio in PowerPoint

Adding sound and narration to your slides

Inserting Audio — Methods & Formats

Audio from File

1. Go to Insert tab → Media group
2. Click Audio → Audio on My PC
3. Browse and select your audio file
4. An audio icon  appears on the slide
5. Drag to desired position on the slide

Supported: .mp3 .wav .wma .aac .m4a .flac

Record Audio

1. Go to Insert tab → Media group
2. Click Audio → Record Audio
3. Enter a name for the recording
4. Click the red Record button ●
5. Click Stop ■ then OK to embed

Records directly via your computer's microphone

Audio Controls (appears on slide when audio icon is selected)

► Play/Pause

◀◀ Rewind

|◀ Back 0.25s

►| Forward 0.25s

 Volume

— Seek Bar

🕒 Timestamp

Double-click audio icon in Slide Show to reveal controls

Audio Playback Settings & Formatting

Select the audio icon → Playback tab appears in Ribbon

▶ Start

Automatically — plays when slide appears
On Click — plays only when icon is clicked
Play Across Slides — continues through slide changes

↺ Loop / Repeat

Loop Until Stopped: Audio repeats continuously until the next click.
Useful for background music throughout a presentation.

🔊 Volume

Set to: Low / Medium / High / Mute.
Always test volume before your actual presentation.

✂ Trim Audio

Playback tab → Trim Audio.
Set Start Time and End Time to play only a clip portion.

👤 Fade In/Out

Add Fade Duration (in seconds) for a smooth start/end.
Professional touch — avoids abrupt audio cuts.

👤 Hide Icon

Check 'Hide During Show' so the audio icon is invisible during presentation. The audio still plays.

Practice Questions — Audio

1

List three audio file formats supported by PowerPoint.

2

What is the difference between 'Automatically' and 'On Click' start options for audio?

3

How would you add background music that plays continuously across all slides?

4

Explain how to trim an audio clip so only the first 30 seconds play.

5

Why would you enable 'Hide During Show' for an audio file?

6

What is the purpose of Fade In/Fade Out settings, and where are they found?

Section 04

Video in PowerPoint

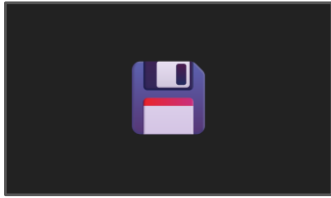

Embedding and formatting video clips

Inserting Video — Three Methods

01

This Device (Local File)

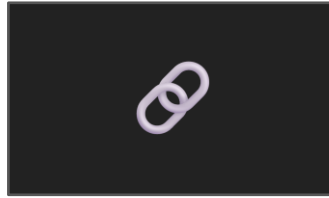

1. Insert tab → Media → Video
2. Select 'Video on My PC'
3. Browse to your .mp4 / .avi file
4. Click Insert to embed
5. Video becomes part of the .pptx file

⚡ File size increases — use compressed video.

02

Online Video (URL)

1. Insert tab → Media → Video
2. Select 'Online Video'
3. Paste YouTube or Vimeo URL
4. Click Insert
5. Requires internet connection to play

⚡ Best for reducing file size. Needs wifi.

03

Video Placeholder

1. Click media icon in Content placeholder
2. Select 'Insert Video'
3. Choose source (local or online)
4. Video fills the placeholder automatically
5. Resize using corner handles

⚡ Keep aspect ratio — drag corners not edges.

Video Playback & Formatting Options

Select video → Two tabs appear: Video Format | Playback

▶ Playback Tab Options

	Start	Automatically / On Click / In Click Sequence
	Trim Video	Set exact start/end time for a clip
	Fade In/Out	Smooth fade duration in seconds
	Volume	Low / Medium / High / Mute
	Loop	Loop Until Stopped
	Rewind	Rewind After Playing — restarts automatically
	Play Full Screen	Plays video in full screen during show
	Hide When Stopped	Hides the video frame when not playing

Video Format Tab

	Poster Frame	Set thumbnail image shown before video plays
	Video Styles	Pre-set frames, shadows and reflections
	Video Border	Add a colored frame around the video
	Video Shape	Crop video into a shape (oval, star, etc.)
	Corrections	Adjust brightness and contrast
	Color	Apply color filters (grayscale, sepia, etc.)
	Crop	Crop the video frame to a region
	Rotate/Resize	Precise sizing in the Size group

Practice Questions — Video

1

What is the difference between embedding a video and linking to an online video in PowerPoint?

2

How do you trim a video clip so it only plays from second 10 to second 40?

3

What is a Poster Frame and when would you use it in a presentation?

4

List two supported video file formats in PowerPoint. Which is recommended?

5

How can you make a video play automatically when a slide appears?

6

A student wants to embed a 500MB video. What problem might this cause, and how can it be solved?

Lab Task

Hands-on Practice — Complete all four tasks below

Task 1

Slide Window Exploration

1. Open a new blank PowerPoint presentation
2. Identify and label all 7 parts of the window in a screenshot
3. Switch between all 5 view modes and note 1 difference each
4. Add 5 slides using the Slide Panel and reorder them

Task 2

Hyperlinks

1. Create a 6-slide presentation on any topic
2. Slide 1: Add a hyperlink to a website of your choice
3. Slide 2: Link text to jump to Slide 5 ('Place in Document')
4. Add a 'Home' Action Button on Slides 3–6 (links to Slide 1)

Task 3

Audio

1. Insert a background music file (.mp3) on Slide 1
2. Set it to play Automatically across all slides
3. Trim the audio to 30 seconds using Trim Audio
4. Add 5 seconds Fade In and 3 seconds Fade Out

Task 4

Video

1. Insert a local video file (.mp4) on a new slide
2. Trim it to play only between 0:10 and 0:40
3. Set a custom Poster Frame (use a frame from the video)
4. Apply a Video Style and set it to play Full Screen

Key Takeaways

Slide Window

PowerPoint window has 7 key areas. Switch views based on your task. Normal View is for editing, Slide Sorter for organizing.

Hyperlinks

Four types: URL, slide, file, email. Use Ctrl+K to add. Action Buttons create interactive navigation for non-linear decks.

Audio

Insert via file or recording. Control start, loop, fade, volume and trim via the Playback tab. Hide icon for clean slides.

Video

Embed local files or link online. Use Trim, Poster Frame, and Video Styles. Compress large videos before embedding.

Questions? Raise your hand or email your instructor. Good luck with the Lab Task!
