

Course Title: Microcomputer Application I
Course Code: CSE-2402

Topic: Microsoft Word topics
(Hyperlink, Macro)

Mohammad Jahedul Alam Chy
Lecturer in CSE
Department of QSIIS

International Islamic University Chittagong (IIUC)

What are Hyperlinks?

Definition

A hyperlink is a clickable text or object that connects to another location, such as a webpage, document, email address, or specific place within the same document.

Key Characteristics

- Usually appears in blue, underlined text
- Cursor changes to hand icon on hover
- Can be applied to text, images, or shapes
- Provides quick navigation
- Essential for interactive documents

Visual Example

Normal Text

[Hyperlink Text](#)

(Blue & Underlined)

Types of Hyperlinks

Web Page

Links to external websites

www.iiuc.ac.bd

Email Address

Opens email client

student@iiuc.ac.bd

Document File

Links to another file

[Report.docx](#)

Bookmark

Jumps within document

[Chapter 3](#)

Creating Hyperlinks: Method 1

Using Insert Tab

- 1 Select text or object**
Highlight what will become the link
- 2 Go to Insert tab**
Click 'Insert' in the ribbon
- 3 Click 'Hyperlink' button**
Found in the Links group
- 4 Enter destination**
Type URL, file path, or email
- 5 Click OK**
Hyperlink is now created

Insert Hyperlink Dialog

Text to display:

Address:

Link to:

- ☒ Existing File or Web Page
- ☐ Place in This Document
- ☐ Create New Document
- ☐ E-mail Address

OK

Creating Hyperlinks: Method 2

Using Keyboard Shortcut

Ctrl + K

Advantages

- Fastest method available
- Works in all Office applications
- No mouse required
- Easy to remember

Pro Tip

Select text first, then press Ctrl+K. The selected text automatically becomes the display text, saving you time!

Creating Email Hyperlinks

Email hyperlinks automatically open the default email client with a pre-filled address. You can also include subject lines and message body text.

Syntax Examples

```
mailto:admin@iiuc.ac.bd
```

```
mailto:support@iiuc.ac.bd?subject=Help
```

```
?body=Hello...
```

Creating Steps

- Select text (e.g., 'Contact Us')
- Press Ctrl+K
- In Address field, type:
mailto:email@domain.com
- Add ?subject=Topic (optional)
- Click OK

Creating Bookmarks

Internal Document Navigation

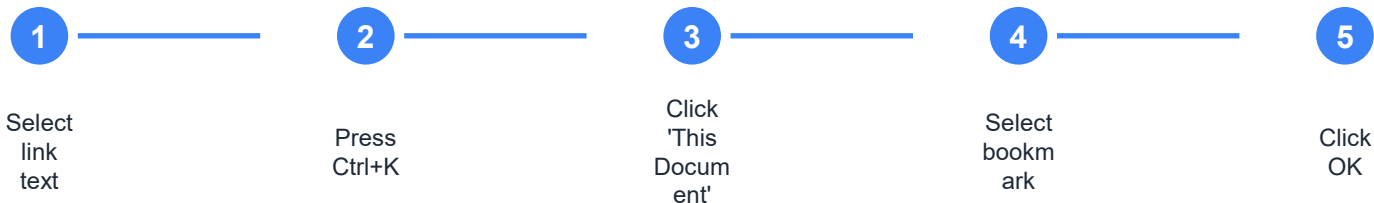

What is a Bookmark?

A bookmark is a named location in your document. It acts like a digital page marker that you can jump to instantly using hyperlinks.

Creating a Bookmark

- Place cursor at target location
- Go to Insert → Bookmark
- Enter bookmark name
- Click Add button

Linking to a Bookmark

Editing Hyperlinks

Method 1: Right-Click

- Right-click the hyperlink
- Select 'Edit Hyperlink'
- Modify address or text
- Click OK

Method 2: Ctrl+K

- Click in the hyperlink
- Press Ctrl+K
- Make changes
- Click OK

Method 3: Remove Link

- Right-click the hyperlink
- Select 'Remove Hyperlink'
- Link removed, text remains

Hyperlink Best Practices

Use Descriptive Text

Instead of 'click here', use 'IIUC Course Catalog'

Test All Links

Verify links work before sharing

Keep URLs Short

Use URL shorteners for long addresses

Update Regularly

Check and update links periodically

Avoid Overuse

Too many links can be distracting

Check Permissions

Ensure recipients can access linked files

Common Hyperlink Issues

⚠ Broken Links

✓ Update or remove outdated links

⚠ Wrong Target

✓ Edit hyperlink and correct address

⚠ File Not Found

✓ Check file path or use relative paths

⚠ Permission Denied

✓ Ensure sharing settings are correct

⚠ Link Not Working

✓ Verify URL format (include http://)

Practical Exercise: Hyperlinks

Exercise: Create a Class Schedule Document

- Task 1: Create hyperlinks to IIUC website (www.iiuc.ac.bd)
- Task 2: Add email hyperlinks for three faculty members
- Task 3: Create bookmarks for each day (Monday-Friday)
- Task 4: Link a table of contents to each bookmark
- Task 5: Add hyperlink to class syllabus PDF file
- Task 6: Test all hyperlinks to ensure they work correctly

 Learning Outcome: Master creating, editing, and managing different types of hyperlinks in professional documents.

What are Macros?

Definition

A macro is a series of commands and instructions that you group together as a single command to accomplish a task automatically. Macros save time on repetitive tasks by automating them.

VBA Code

```
Sub MyMacro()  
    'Code here  
End Sub
```

Benefits of Macros

- Save time on repetitive tasks
- Reduce human errors
- Standardize document formatting
- Automate complex procedures
- Increase productivity significantly

Common Uses

- Format documents consistently
- Insert standard text blocks
- Create custom commands
- Process data automatically
- Generate reports quickly

Think of it as **recording a video** of your clicks. Once recorded, Word can "play back" those actions much faster than a human could.

How Macros Work

- Macros record user actions step-by-step
- Stored as VBA (Visual Basic for Applications) code
- Can be replayed anytime
- Execute multiple commands instantly
- Can be assigned to buttons or shortcuts

Steps to Record a Macro

- Go to View → Macros → Record Macro
- Enter macro name
- Choose storage location
- Assign shortcut key or button (optional)
- Perform actions to record
- Click Stop Recording

How to Use Macros

- Go to View → Macros → Record Macro
- Give macro a name
- Perform actions
- Click Stop Recording
- Run anytime from View → Macros → Run

Example

Task: Format selected text automatically

- Recorded Actions:
- Bold
- Font size 14
- Center align

Result: Running macro formats any selected text instantly.

Running a Macro

Method 1 — From Menu

- View → Macros → View Macros
- Select macro
- Click Run

Method 2 — Keyboard Shortcut

- Press assigned key combination

Method 3 — Button

- Click custom toolbar button

Saving Documents with Macros

Steps:

1. Click File → Save As
2. Choose location
3. Select file type:
Word Macro-Enabled Document (*.docm)
4. Click Save

Assign Macro to Keyboard Shortcut

Steps:

1. View → Macros → Record Macro
2. Click Keyboard option
3. Press shortcut (e.g., Ctrl+Shift+B)
4. Assign → Close

Assign Macro to Button

Steps:

1. File → Options → Quick Access Toolbar
2. Choose Macros from list
3. Select macro → Click Add
4. Click OK

Now macro runs when button is clicked.

Security Warning About Macros

- Macros can contain harmful code
- Always enable macros from trusted sources only
- Disable macros in unknown files
- Word shows security warning when opening macro-enabled documents
- File types with macros:
 - .docm
 - .dotm

Hyperlink vs Macro (Comparison)

Feature	Hyperlink	Macro
Purpose	Navigation	Automation
Action	Opens link	Runs commands
Skill	Basic	Basic → Advanced
Speed	Instant	Instant
Risk	Low	Medium (security)

Format Painter vs Macro (Comparison)

Feature	Format Painter	Macros
Primary Use	Copying visual styles (colors, fonts).	Automating multi-step workflows.
Complexity	Simple; no setup required.	Requires recording
Scope	Formatting only	Commands, text entry, and layout
Storage	Temporary (until you stop using it).	Permanent; can be saved to the Normal.dotm template.

Practice Questions

Short Questions

1. Define hyperlink.
2. What is a bookmark?
3. Write shortcut key for inserting hyperlink.
4. What is a macro?

Practice Questions

Conceptual Questions

1. Why should hyperlinks be descriptive?
2. Explain macro security risk.
3. Why save macro files as .docm?
4. When should macros be used?
5. What happens if hyperlink path changes?

Practice Questions

Practical Questions

1. How to link text to another section of document?
2. Steps to edit hyperlink.
3. How to assign macro to button?
4. How to run macro using keyboard?
5. Write simple macro to italicize text.

Lab Task 1 — Hyperlink Navigation Document

Create a mini handbook with:

Title page

Table of contents

5 sections

Bookmark for each section

TOC linked to bookmarks

External website hyperlink

Lab Task 2 — Email & File Linking

Create a student contact document containing:

- 5 email hyperlinks
- 3 file hyperlinks
- 2 image hyperlinks
- Test all links

Lab Task 3 — Macro Automation

Create a macro that:

Makes text bold

Changes font size to 14

Centers text

Adds blue color

Assign:

Keyboard shortcut

Toolbar button

Test macro on sample paragraph.

Thank You
Any Questions?
